Laboratory Report

Course Title: System Analysis & Design Lab

Course Code: CSE22P5

Lab Report No.: 02

Lab Report Name: Create a use case diagram of hospital management system

Submitted by

Md. Nazmul Huda Alamin

Id No.: 20-0-52-801-031

Session: 2020-2021 2nd Year

2nd Semester 2022

Term: 222

Dhaka Regional Center

Submitted to

Lab Report No.: 02

Lab Report Name: Create a use case diagram of hospital management system.

Instrument:

- Computer
- EdrawMax Software, etc.

Procedure:

- At first, we have to learn about hospital management system.
- After learning about hospital management system, we have to power on the computer.

When the computer is ready to use, we have to open EdrawMax software.

- After opening EdrawMax software, we have to create the use case diagram of a hospital management system.
- Finally, after drawing the use case diagram, we have to ensure the use case diagram is correct.

Hospital Management System:

1. Actors

- o Patient: An actor related to hospital management system.
- o Doctor: An actor related to hospital management system.
- o Nurse: An actor related to hospital management system.
- o Receptionist: An actor related to hospital management system.
- o Employee: An actor related to hospital management system.
- o Technologist: An actor related to hospital management system.
- o Technician: An actor related to hospital management system.

2. Doctor Appointment Info: This likely refers to updating the system on appointments.

3. Check Up: This could be the initial consultation with a doctor.

4. Tests Appointment: This could be for lab tests, X-rays, etc.

5. Undergo Operation: This could be a surgical procedure.

6. Prescription: This could be for medication after a diagnosis.

7. Admit/Discharge: This refers to admitting a patient to the hospital or discharging them.

8. Patient Information: This refers to registering new patients or updating a patient's medical record.
9. Ward wise bed status: This refers to updating the system on bed availability in different wards.
10. Edit Doctor/Nurse/Staff: This could be for updating staff information within the system.
11. Cleaning: This likely refers to logging cleaning tasks.
12. Meals: This likely refers to ordering meals for patients.
13. Open Machinery Application: This could be launching specific software to operate medical equipment.
14. Open Machinery Repair: This could be for reporting malfunctioning equipment.

Use Case Diagram:
